

Match the correct idea to its reason

Idea		Reason
Limit the number of days that boats can fish.		Young fish are not caught before they have a chance to breed.
Set Fishing Quotas for maximum amount that can be caught per year.		The mass of fish per catch will be smaller.
Reduce total net sizes.		Prevent fish being caught during the breeding season.
Increase net mesh sizes.		Prevents fish in certain areas from being fished so that population can increase.
Establish no-fishing zones.		This limits the biomass that can be caught to sustainable amounts.
Ban fishing at certain times of the year.		
Farming Fish		Reduces the overall amount that will be caught over the year.
