Role of respondents in the implementation process of the policy

### **Opinion of respondents on Policy Effectiveness**

# INTRODUCTION

A total of 19 participants in the mentioned survey in IBD represented 11 government departments, academia, Chambers of Commerce, Bar Council and NGOs/CBOs.

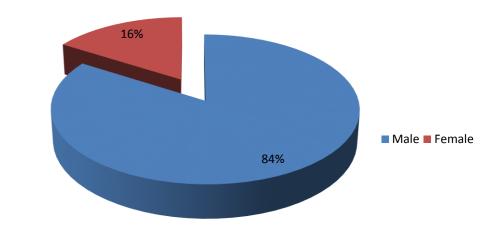

The West Bengal State Action Plan on Climate Change (2012) emerged as the most well known document amongst the participants of the survey.

They all opined that this action plan is a good one which could help people adapt better in the vulnerable IBD, if it could be implemented better.

## DISCUSSION

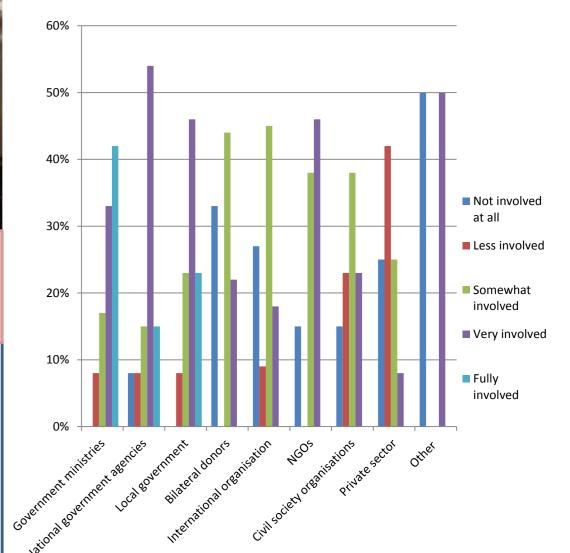

One of the striking takeaways from the survey was that most of the respondents were not acquainted with the policies/action plans/programmes, etc. present at the State level.

Only a total of 30% respondents are involved in implementation of the selected policy/action plan.

Livelihood diversification within agriculture emerged as one of the aspects, which is mostly addressed by the selected policy/action plan.

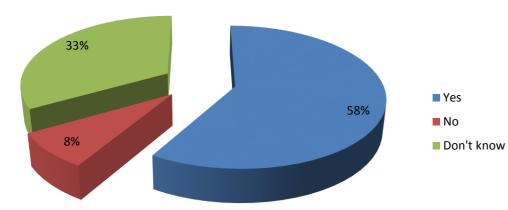

**Opinion of respondents on the** Level of stakeholder involvement in policy implementation

**Opinion of respondents on the** effectiveness of the leading government department in

### Awareness of respondents on presence of a monitoring and evaluation framework

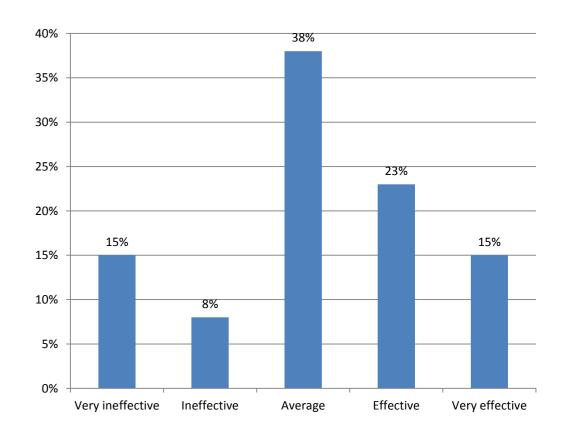

A total of 56% respondents were not sure about the timeframe of policy/action plan, while 13% respondents the selected acknowledged that they had no idea about it.

Some respondents felt that a close and effective coordination of the relevant departments and agencies with the Environment Department as the nodal point is the need of the hour.

One of the respondents stressed on the necessity of having a regular monitoring of the physical and financial progress by the competent authority.

### implementing the policy
