

Open Access Jargon Buster

Open Access when applied to publications means that the content is freely available to anyone anywhere in the world that has an internet connection. This guide is to help with some of the terms that you may come across related to Open Access.

AM/AAM = Author Manuscript/Accepted Manuscript/Author Accepted Manuscript: the post-peer review version of a research output/publication, incorporating changes from peer review, normally a Word document with no publisher markings but may be a template. The AM is required for repository open access for e.g. REF and UKRI and can be cited as you would cite the final published version as the content is identical.

AO/Author's Original: the pre-peer review version of a research output. It may have been submitted but no decision received. Also known as a preprint or submitted manuscript

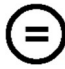

APC/Article Processing Charge: fee charged by some journals for publishing an article open access

CC BY: the open access license required by many funders for publisher open access. CC BY stands for Creative Commons Attribution. The license allows users to share and adapt the material in any way including for commercial purposes, to the benefit of society, so long as attribution/credit is given to the creator. <https://creativecommons.org/licenses/by/4.0/>

Creative Commons licenses: Creative Commons is an organisation which has released freely-available copyright licenses. These licenses allow people to say how they would like to share their work. They are designed to help people share their works more easily without barriers at the point of use. It tells the user what they can do with the work <https://creativecommons.org/choose/>. Licenses take the form of CC (Creative Commons) followed by 1- 3 sets of 2 letters. https://library.soton.ac.uk/ld.php?content_id=33836518

BY  – Credit must be given to the creator

NC  – Only noncommercial uses of the work are permitted

ND  – No derivatives or adaptations of the work are permitted

SA  – Adaptations must be shared under the same terms

CRIS: Current Research Information System – ours is Pure

DOI: (Digital Object Identifier) This is a permanent identifier to enable a user to find an item electronically. For example, a journal article can have a DOI that looks like this: 10.1000/182

Embargo: the length of time after publication required by some publishers for the AM in a repository to be restricted before it can be made open access, may be 6-48 months. Our repository team set any required embargoes. (This is separate to a press embargo)

ePrints Soton: our institutional repository, fed by Pure

eprints@soton.ac.uk: our email address for your open access questions

Fully Open Access Journal: A journal where its entire content is open access and available to anyone with an internet connection, authors may have to pay an Article Processing charge/APC to publish in the journal.

Gold Open Access: the journal article is made open access on the journal website, and is available to any internet user. Also known as Publisher Open Access. Typically requires payment of an APC, may be sponsored by an organisation, or may be covered by a deal we have with the publisher:
<https://library.soton.ac.uk/openaccess/agreements>

Green Open Access: self-archiving the Accepted Manuscript in Pure. Also known as Repository Open Access. Our repository team will add any required publisher embargo, after which time it will be open access via ePrints Soton. There is no additional cost to the author to make a publication open access this way.

Hybrid Journal: a subscription journal containing a mix of both open access and paywalled content. Many of our publisher agreements are designed to help hybrid journals transition to full open access and are usually supported by open access block grants.

Institutional Repository: an archive for collecting, preserving, and disseminating digital copies of the research outputs of an institution. ePrints Soton is the University of Southampton's

OABG: acronym we sometimes use in the Library for the Open Access Block Grants provided by funders in support of publishing research outputs. These funds may be available for research articles acknowledging these funders grants in fully open access journals.
<https://library.soton.ac.uk/openaccess/howto>

ORCID ID: This is a unique researcher ID. It helps avoid confusion between researchers with the same or similar names. ORCID stands for **Open Researcher and Contributor Identifier**.

Press Embargo: A press embargo is when authors cannot publicly share details of their article/book etc until a date set by the publisher – usually the date of first publication. This is important for press releases and taxonomic works. Please contact eprints@soton.ac.uk if a press embargo is required on your research output.

Publisher Open Access: the journal article is made open access on the journal website, and is available to any internet user. Also known as Gold Open Access.

Pure: is the University's Current Research Information System. It is a closed system available to University staff and Post Graduate Research students. Research Outputs are then uploaded to Pure and then published to ePrints which is the University public Institutional Repository.

REF: Research Excellence Framework, the system for assessing the quality of research in UK higher education institutions.

Repository Open Access: Also known as green open access. Authors upload permitted versions of their publications to a repository so any internet user can access the content. Typically, this is the accepted manuscript or the Author's original. There are different types of Repository Open Access, Institutional such as ePrints Soton or Subject such as ArXiv.

Research Outputs: A research output is anything published/produced from research. It can be a journal article, conference paper, book, thesis, Music score, software (and many more)

Sherpa Romeo: Sherpa Romeo is an online database of journals Open access policies. We use it to check journal embargo periods.

Subscription journal: a subscription journal contains paywalled content. Also known as a hybrid journal. University users will often have access to a journal as the University has purchased a subscription.

Transformative Agreement/TA: a deal we have with a publisher, generally negotiated nationally, providing open access at no cost to the author. Find out more:
<https://library.soton.ac.uk/openaccess/agreements>

Version of Record (VoR): Version of Record (VoR) is also known as the definitive, authorised, formal, or published version, although these terms may not be synonymous.
